

About Triangle, Inc.

Triangle, Inc. offers innovative and comprehensive programs that provide greater opportunities for employment, empowerment, independence, and community inclusion for people with disabilities.

Community-Based Day Services & Supported Employment

Triangle, Inc. operates four day services programs in Malden (2), Randolph, and Salem. These programs provide group supported employment, individual supported employment, and community-based day services (CBDS) to adults and students with disabilities in partnership with the Department of Developmental Services and local school districts. Triangle, Inc.'s day services place a strong emphasis on community-based employment, giving all participants an opportunity to earn a paycheck.

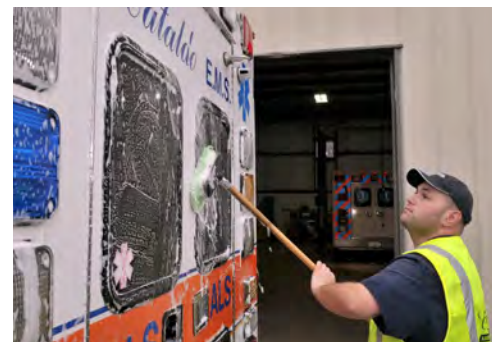

Residential Services

The organization operates nine residential homes in MetroNorth and North Shore communities that provide loving, caring, and nurturing support to 43 individuals. Triangle, Inc. has decades of experience in building a family atmosphere in each home, while providing each person with individualized opportunities to explore their own interests and activities in the community.

Workforce Development & Career Services

Triangle, Inc. works with individual job seekers and inclusive employers to create win-win job placements throughout eastern Massachusetts. The organization's employment specialists are experts in providing skills and interest assessments, job search assistance, interview prep and coaching, and, once placed, ongoing employment supports to both youth and adults. The organization also offers credential training programs for individuals entering competitive growth industries.

IMPACT Boston & IMPACT:Ability

IMPACT Boston, an empowerment self-defense organization that provides services to a variety of populations, became an affiliate of Triangle, Inc. in 2005. In the following years, the two organizations merged their areas of expertise to create IMPACT:Ability, an evidence-based curriculum that teaches personal safety skills and healthy relationship habits to both students and adults with disabilities. This program is a national leader in abuse prevention that directly addresses the epidemic rates of violence and abuse faced by individuals with disabilities.

Empowering People for Inclusive Communities (EPIC)

EPIC is the only service learning program for youth with disabilities in New England. This program brings together cohorts of young leaders to perform monthly community service projects while honing their leadership skills. Over the course of the year, EPIC Service Warriors demonstrate that youth with disabilities are powerful agents for change in their communities.
